PERSONAL PROJECTS

- What's Next?** - This is a website that was made in React. It serves the purpose of providing recommendations to the users on the movies and the series that they can watch next based on the type or similar to the movies they have watched. It uses TMDB API for this purpose and uses MySQL for database.
- Roomazon** - Roomazon is an Android App made in Flutter Environment. It serves the purpose of finding Rental Rooms and Roommates. It uses Dart Language on the front end and Firebase as database.
- Musik** - Modern-day music player made using React, Redux, TypeScript, Tailwind CSS.
